In the first level, it's a first-person game, the player is a spy, and his mission is to steal a file from enemy's base. After picking up the file, all the lights in the base will be taken off, and the alarm will start, at the same time some robot guardians will start attacking player. So the player needs to find a flashlight and run to the exit.

To control the player, you can use WASD for walking. If the player gets close to the file or flashlight, you can press "E" to pick up the item. If you have the flashlight in your hand, you can press "F" to open the light.

Afterwards, the player get the file and then drive an aircraft to escape. However, our player meets lots of enemies who drive aircraft as well and hit to our player's aircraft. In this situation, player's goal is to destroy all enemies' aircraft and survive from this "fighting".

To control the aircraft, player can use the keyboard. "Up" key is to go forward; "Down" key is to go backward; "Left" key is to go left; "Right" key is to go right. Player can use "Space" to fire bullets.
